Abstract

The manuscript should contain an abstract. The abstract should be self-contained and citation-free and should not exceed 225 words.

Introduction

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Method and Materials

Provide sufficient details about the Method you used in this research to reach the conclusion. Materials already published should be indicated by a reference: only relevant modifications should be described.

Results

Results should be clear and concise.

Discussion

This should explore the significance of the results of the work, not repeat them. A combined Results and Discussion section is often appropriate. Avoid extensive citations and discussion of published literature.

Conclusions

The main conclusions of the study must be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

Acknowledgments

All acknowledgments (if any) should be included at the very end of the paper before the references and may include supporting grants, presentations, and so forth.

Reference List

Should be prepared using Harvard-style according to the instructions mentioned in the 'Submission Format'.
